About AC300

Jesmonite AC300 is a water-based, modified gypsum composite material used to create decorative mould products. The material is an economic alternative to Jesmonite AC100. Jesmonite AC300 can be cast or laminated using Jesmonite Quadaxial Glass.

Jesmonite AC300 can be pigmented to any colour required by using it in conjunction with Jesmonite Liquid Pigments.

Jesmonite AC300 achieves a B-s1-d0 EN13501-1 Fire Classification.

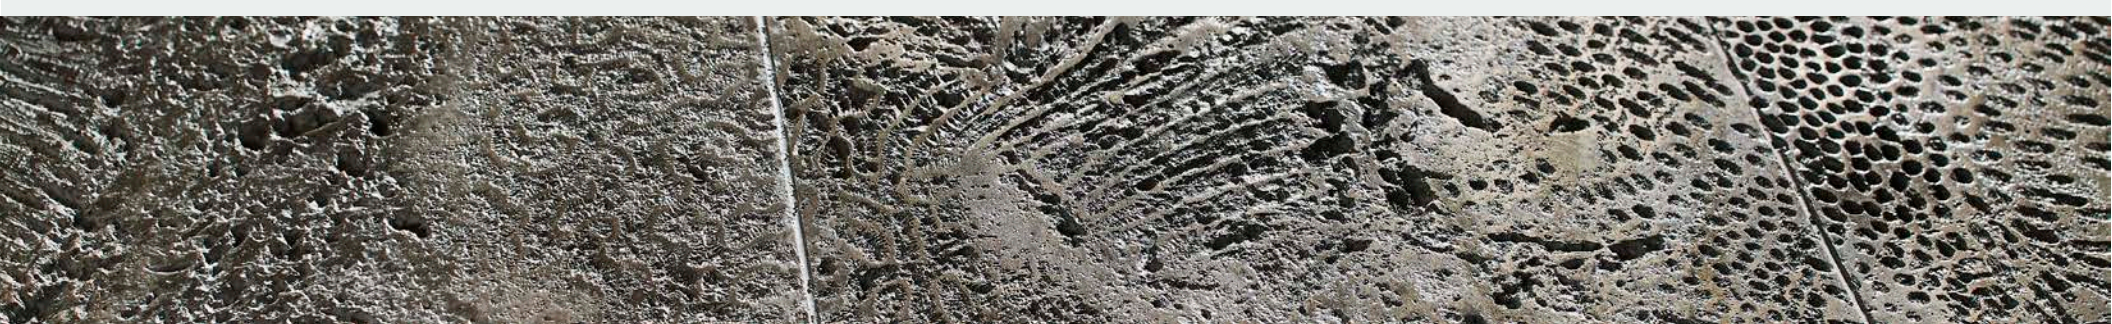

AC300 Applications

Jesmonite AC300 is supplied with a range of ancillary products including glass reinforcements, pigments, fillers, and control chemicals to adapt the material to the widest range of applications.

Architectural Elements
Internal Panels
Sculpture
Tableware
Furniture
Lighting Elements
Prop Work
Decorative Tiles

AC300 key benefits

Stronger

Strong, flexible, and more durable, with an increased impact resistance.

Lighter

Lighter than stone, concrete and traditional sand and cement products.

Safer

Independently fire rated in accordance with European Fire Classification EN 13501-1. Solvent free with no VOC's.

Finer

Replicates the very finest detail with superior weathering qualities.

Greener

Water-based making it kinder to the environment.
