

AC630

JESMONITE
MADE FROM
TE®

About AC630

Jesmonite AC630 is an acrylic polymer modified, cement-based composite. It is a shrinkage-compensated material of low permeability and is durable in all conditions of weathering. The product contains a fine decorative aggregate and powder pigments, carefully controlled to give a consistent decorative surface finish.

Jesmonite AC630 can be custom matched to a wide range of bespoke colours.

Jesmonite AC630 achieves a Non-Combustible A2-s1-d0 EN13501-1 Fire Classification.

AC630 Applications

Jesmonite AC630 can be used for a range of decorative applications that require greater dimensional stability, overall strength and enhanced durability within extreme weather conditions. The Jesmonite AC630 technology can be utilised for fine surface detail retrieval, castings, premix flat panel and lightweight laminated applications.

Flat Panels
Architectural Elements
Sculpture
Tableware
Furniture
Water Features
Lighting Elements
Prop Work
Decorative Tiles

AC630 key benefits

Stronger

Strong, flexible, and more durable, with an increased impact resistance.

Lighter

Lighter than stone, concrete and traditional sand and cement products.

Safer

Independently fire rated in accordance with European Fire Classification EN 13501-1. Solvent free with no VOC's.

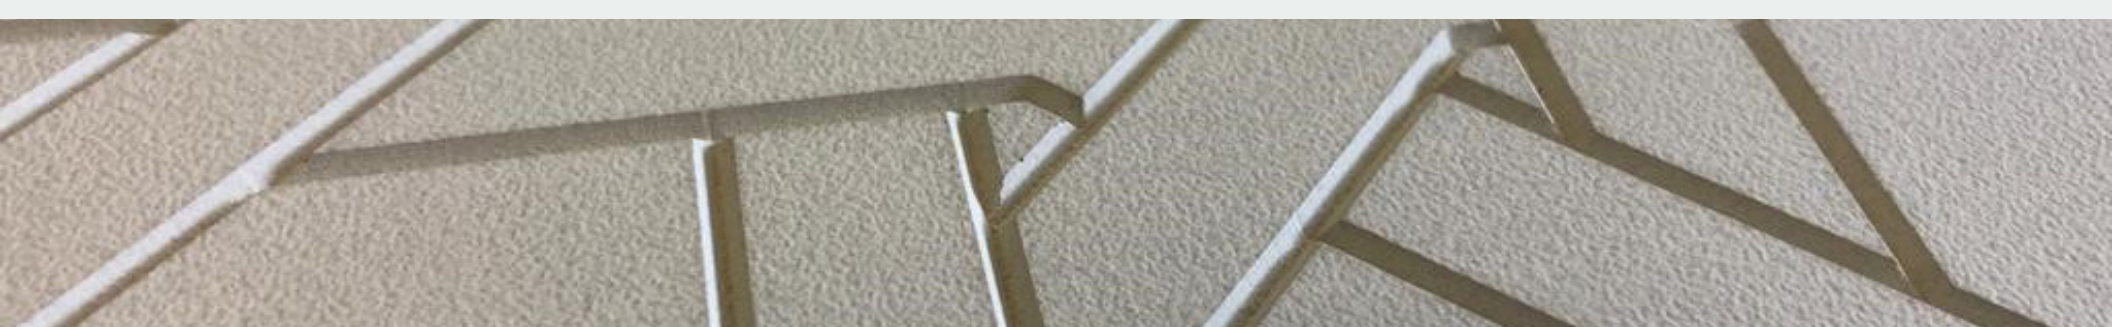

Finer

Replicates the very finest detail with superior weathering qualities.

Greener

Water-based making it kinder to the environment.
